-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1725

1. Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the expression of "particularly steel" renders the scope of the claim indefinite since it is not clear what scope is claimed.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 7-108,355 and further in view of JP 2000-52,006 and JP 3-161,153.

JP '355 substantially shows the invention as claimed except that it does not show the detailed structure of the EM stirring means. However, JP '006 shows to use an EM stirring means with poles of tapered end to reduce the leakage flux in the

Art Unit: 1725

EM stirring means. It would have been obvious to use the tapered poles of JP '006 in the EM stirring means of JP '355 to reduce the leakage flux. Further, JP '153 show to use a traversing-magnetic-field type EM means to improve the stirring efficiency. It would have been obvious to provide a traversing-magnetic-field type EM stirring in JP '355 in view of JP '153 to improve the stirring efficiency. With respect to claim 9, it would have been obvious to provide a heat shield to a metallurgical structure element wherever it deemed necessary to shield the heat from the molten metal. With respect to claim 12, US 4,834,168 and 4,256,156 show that feature to be conventional.

5. US 4,321,958 is cited to further show the state of the stirring art.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
